Set-asides:

Primary NAICS: 332813 -
Electroplating, Plating, Polishing,
Anodizing, And Coloring

Capabilities Statement

In 2012, Great Lakes Metal Finishing LLC was acquired by and became a subsidiary of Classic Turning, Inc. one of the Midwest's largest and fastest growing CAD/CAM design and CNC machining companies. For more than 35 years Classic Turning has been serving a multitude of industries including the aerospace, medical, precision automotive, industrial machine building and military industries. This acquisition positions the company for growth particularly in the aerospace and medical market and qualifies Classic Turning to supply parts complete with all special metal finishing operations done in house with greatly reduced cycle time.

Great Lakes Metal Finishing LLC operates out of a 14,500 square foot facility located in Jackson, Michigan. Great Lakes Metal Finishing provides a variety of metal finishing services including: Anodizing Type II and III, Passivation, Dry film lubrication (DFL), Dry blast, Paint, Chromate Type I & II, Phosphate coat on titanium.

It is our mission to become the Supplier of Choice to our valued customers for the supply of quality products and services.

Core Competencies

- Phosphate Coat on Titanium
- Anodizing Type II and III
- Passivation Dry Film Lubrication (DFL)
- Dry Blast
- Paint
- Chromate Type I & II

Differentiators

Great Lakes Metal Finishing LLC offers many colors and the fastest turn around times in the industry, but we know that it means nothing without quality. With careful attention to chemistry, we control our tank line to ensure that your parts are processed correctly. This allows us to provide you with both the highest quality metal finishing along with repeated cosmetic quality. NADCAP certified, ASR Registrar, United States Federal Firearms License.
